ABOUT ME

Enthusiastic Computer Science undergraduate with experience in web development, graphic designing, and AI-related technologies. Dedicated to building innovative solutions, improving user experiences, and continuously learning emerging digital skills.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Fatima Jinnah Women University, Rawalpindi | 2023-Present

CGPA: 3.35 / 4.00

FSC in Pre-Engineering

F.G Postgraduate College For Women, Wah Cantt | 2021-2023

Grade A1

Matric in Science

F.G Girls High School No.4, Wah Cantt | 2019-2021

Grade A1

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript, Java, React.js, Next.js, HTML5, CSS3

Technical Tools: VS Code, Github, Spyder, SQL Developer, Figma, Canva, MS Office

KEY PROJECTS

Analyzing Trust and Ethical Concerns of AI in Healthcare Systems

- Conducted a research-based capstone project exploring ethical, transparency, patient safety, and governance challenges of AI technologies in healthcare systems.
- Analyzed the impact of AI on clinical decision-making, data privacy, and professional accountability while proposing responsible AI adoption frameworks.

Stack-Based Text Editor

- Developed a console-based text editor in C language with insert, delete, replace, undo, and redo functionalities using stacks and linked lists for efficient text management.

Workflow Automation Using Apache Airflow

- Built an automated ETL workflow orchestration project using Apache Airflow and Docker for processing and managing datasets through scalable pipeline automation.

Verilog Traffic Light Controller

- Designed a Verilog-based Traffic Light Controller using FSM concepts for traffic signal management and pedestrian crossing with timer-based control and simulation testing.
- Implemented FSM-based traffic signal sequencing with simulation testing to ensure accurate and efficient traffic flow control.
