ABOUT ME

Computer Science student at Fatima Jinnah Women University, Rawalpindi, interested in Artificial Intelligence, web development, and data-driven systems. Certified Generative AI Application Developer with skills in Python and modern web technologies. Passionate about building practical, user-focused solutions and continuously improving technical and problem-solving abilities. Seeking internship opportunities in AI, software development, and data-related fields.

EDUCATION

Fatima Jinnah Women University, Rawalpindi	2023 – 2027
Bachelor of Science in Computer Science	
CGPA: 3.35/ 4.0	
F.G Postgraduate College for Women, Wah Cantt	2021 – 2023
FSC Pre-Engineering Marks: 887/1100	
F.G Girls High School No.4, Wah Cantt	2019-2021
Matric in Science Marks: 1023/1100	

PROJECTS

- **Wireless Modulation & AWGN Channel Simulation:** Evaluated the performance of digital modulation techniques over an AWGN channel in Python through BER and SNR analysis, supported by technical documentation.
- **AI-Based Language Translator:** Built a multilingual desktop application using Python with speech recognition, translation, and text-to-speech capabilities, featuring an interactive GUI for real-time language conversion.
- **Workflow Automation Using Apache Airflow:** Developed automated ETL workflows using Apache Airflow and Docker, implementing task scheduling, monitoring, and dependency management for efficient data processing.
- **Verilog Traffic Light Controller:** A Verilog-based Traffic Light Controller using Finite State Machine (FSM) concepts with integrated pedestrian crossing mode, timer-based state transitions, and simulation verification through a testbench.
- **ESP32 Wi-Fi Controlled Servo Motor:** An IoT-based system that uses an ESP32 microcontroller to control a servo motor remotely over Wi-Fi, enabling precise 0°–180° movement using PWM signals.
- **BookHive Library Management Mobile App:** A React Native based Library Management mobile application that provides user authentication, book and member management, issued/returned book tracking, and dashboard navigation through a responsive mobile interface.

-
- **Linux Network Services Deployment:** A Linux-based networking project demonstrating the deployment and configuration of FTP, DNS, DHCP, and Apache web services on Ubuntu using Oracle VirtualBox in a virtual enterprise network environment.

PROFESSIONAL CERTIFICATIONS

Generative AI Application Developer

(UETF USA, HEC & NCEAC)

Artificial Intelligence Fundamentals

(Google)

WordPress Development

(DigiSkills Pakistan)

Prompt Engineering

(Coursera)

Maximize Productivity with AI tools

(Google)

UI UX Design Using AI

(WebDev Masters)

Data Analytics & Business Intelligence

(DigiSkills Pakistan)

Freelancing

(DigiSkills Pakistan)

Aspire Leaders Program

(Aspire Institute)

Introduction to AI

(Google)

Graphic Designing

(DigiSkills Pakistan)

Project Management Essentials

(Horward University)

ADDITIONAL

- **Technical and Soft Skills:** Python, Java, C/C++, JavaScript, PHP, React Native, HTML/CSS, MySQL, Data Analytics, Apache Airflow, Database Management, Statistical Analysis, Research and Documentation, Graphic Designing, Docker, Project Management, Cisco Packet Tracer
- **Interests:** Artificial Intelligence and Generative AI, Web and Software Development, Data Analytics, Intelligent Systems, Wireless Communication Technologies, and Emerging Digital Innovations.
- **Achievements:** Scholarship Holder in Grade 5 & Grade 8
- **Languages:** English (Professional Proficiency), Urdu (Native)
